

Video Surveillance

Access Control

# Security Center Web Client

## A Thin Client for Everyday Security Operations

As security personnel will frequently need to monitor their video surveillance and access control systems when away from their workstation, the [Security Center Web Client](#) provides a convenient application to access core system functionality remotely. Through this thin client, users can easily access Security Center monitoring and reporting tasks with only a web browser, and no additional software installation.

With the web client, users can remotely monitor cameras and access control events, receive real-time system alarms, export video, and manage cardholder credentials, allowing them to take control of their security system from anywhere.

## Key Benefits

- ▶ Monitor your Genetec video surveillance and access control systems from a web browser
- ▶ View system alarms and door activities to review incidents
- ▶ Configure and manage cardholder credentials and access rights

## Key Features and Specifications

- ▶ **Unified Video and Access Control:** Security Center Web Client enables operators to monitor access control events with associated video and cardholders pictures.
- ▶ **Manage Cardholders & Credentials:** Create new cardholders, modify access rights, and define cardholder credentials.
- ▶ **Control PTZ Cameras:** Control your PTZ cameras through intuitive controls, and PTZ presets.
- ▶ **Query System Alarms:** Rapidly search for system alarms and view associated video.
- ▶ **Bookmark Video of Interest:** Bookmarks can rapidly be added to tag video of interests, and easily retrieve clips later on.
- ▶ **Remotely unlock doors:** Lock and unlock doors to respond to entry and visitor requests.
- ▶ **Export Video Clips:** Export video of interest from the web client, including watermarks and encryption, and save clips to your local system.
- ▶ **Create Cardholder Groups:** Create and modify cardholder groups, and the cardholders, credentials, and partitions belonging to them.

## Web Client Requirements

### Desktop Browsers

- Apple Safari
- Google Chrome
- Internet Explorer (IE9, 10, and 11)
