

Unity H6X Camera Line

Flexibility and compliance at your fingertips

Experience ultimate deployment flexibility with the Avigilon Unity H6X camera line. Built without mics or wireless tech for privacy and cybersecurity compliance, it features 2, 4, 6 and 8 MP options. Choose from dome, bullet and box models, plus analytics for unmatched awareness.

AI-powered video analytics

Stay on top of what's happening at your site with built-in video analytics to alert you on unusual crowds, activity and potentially critical events.

Dynamic privacy masking

Easily comply with privacy needs by tracking and blurring people and vehicles in video, while allowing authorized personnel to lift the blur during investigations.

Outdoor-ready design

Safeguard the outdoors by deploying the outdoor dome or bullet that are rated IK10/11, IP66/67/IP69K and NEMA Type 4X to withstand impact, water and more.

Low-light clarity

Capture every moment in low light with our IR models. The split IR dome ensures 24/7 visibility, even with dust buildup, minimizing maintenance visits.

Secure & compliant

Trust that your data is well-protected with advanced cybersecurity features such as an onboard FIPS 140-2 level 3 compliant TPM and Secure Boot.

ONVIF® conformant

Integrate with ONVIF systems using Profile S and T. Search, playback and retrieve edge recordings with Profile G, plus cross-functionality with third-party analytics with Profile M.
