

H4 VIDEO INTERCOM

3 MP

REMOTELY IDENTIFY, COMMUNICATE AND AUTHORIZE ACCESS

The H4 Video Intercom integrates a 3 MP fisheye camera with a high-performance intercom, featuring echo-canceling and noise reduction technologies, for clear two-way communication with visitors. Combined with Avigilon Control Center (ACC) video management software, this secured entry system enables operators to quickly and easily identify and talk with a visitor before remotely granting access.

APPEARANCE SEARCH

Use ACC™ software to quickly search for a visitor using Avigilon Appearance Search™ technology, which incorporates the unique characteristics of a person's face to search for the same individual, even if items such as their clothing change over time

SELF-LEARNING VIDEO ANALYTICS

Classifies people that appear in front of the intercom for operators to enable Appearance Search* and sort through hours of video in minutes to locate a person of interest

LIGHTCATCHER™ TECHNOLOGY

Offers exceptional detail in low-light settings

WIDE DYNAMIC RANGE

Captures details in scenes with both very bright and very dark areas

WIDE ANGLE OF VIEW

120° vertical angle of view to clearly capture individuals of different heights

HDSM SMARTCODEC™ TECHNOLOGY

Combines compression technologies to maximize bandwidth and storage savings

SIP PROTOCOL

Provides greater flexibility in routing incoming calls, enables integration with phone exchange, and provides decreased downtime

CONTENT ADAPTIVE IR

Adjusts IR beam width and illumination settings based on scene conditions to help maximize image quality
