## Experience modern access security—your smartphone is your key.

Tap into the simple, safer way to unlock doors with the Avigilon Alta Open app.

**MOTOROLA SOLUTIONS**

# Advanced security, simplified access. It's a win-win.

With all the benefits that modern access control offers, traditional keycard and fob credentials can present challenges. Lost cards create security risks, provisioning new users is time-consuming, and managing guest access adds unnecessary headaches. Enter Avigilon Alta Open—a modern iOS and Android app that offers mobile credentials and access to your secured areas.

Replacing keycards and fobs with a mobile badge streamlines entry – users can tap their phone or wave a hand to unlock a door. Employees are also less likely to forget their phone than they are a physical card, or lend it to a coworker for access. The Alta Open mobile app means easier access for employees or residents, while giving admins peace of mind by eliminating concerns about lost credentials. It's a win for everyone.

## Streamline user management for security teams

Avigilon Alta Open offers security managers a scalable solution for granting or revoking access in a few clicks. Previously, bulk adding users involved purchasing, shipping and managing physical keycards. With Alta Open, security staff can send secure mobile credentials directly to smartphones via an app, link or QR code. New users simply download the app to gain access.

# Key features

## Smart, connected, secure buildings

Mobile badges streamline admin tasks with features like user permission management, visitor access and advanced security options. Users can quickly report issues like stuck doors through the app, ensuring better oversight and an improved user experience.

## Complete control, anytime, anywhere

Authorized users can remotely lock or unlock doors, or activate emergency lockdown plans instantly from the app.

## Wave goodbye to keycards

Unlock doors with a wave of a hand or elbow — users can keep their phone in their pocket or use an Apple Watch for touchless access.

## A smarter way to welcome guests

Send temporary credentials with a link, or see and speak to guests and unlock entries directly with the Avigilon Video Intercom Reader Pro for smooth visitor access.

## Triple the reliability

Patented Triple Unlock technology sends Bluetooth, Wi-Fi and LTE signals simultaneously to ensure the fastest, most reliable mobile credential on the market.

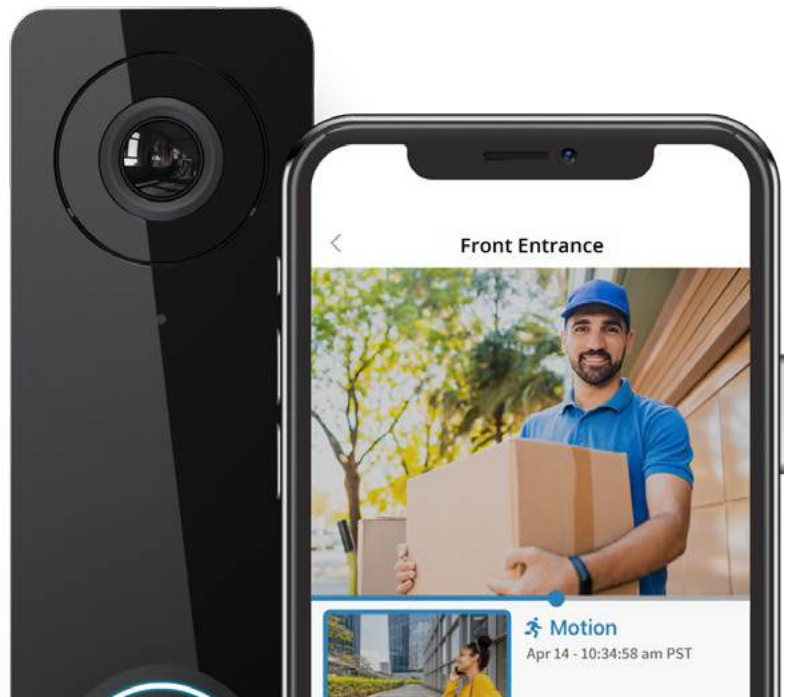

## Automatic entry detection

Automatically find nearby Avigilon Alta entries and save favorites on the home screen to make access fast and frictionless.

## Visual verification with digital badges

Go beyond static keycards. Admins can replace or complement physical credentials with customizable mobile badges.

# Say goodbye to keycards and complexity

It never feels good when someone loses a keycard. With the Avigilon Alta Open app, your users can use their smartphones as a convenient, secure, digital credential to access doors. Gain access to the trusted Avigilon ecosystem for enhanced security and streamlined door-access management, all through the convenience of their smartphone.
