

AERWATCH® FOR SHOPPING MALLS

AERVISION
TECHNOLOGIES

-  **Cost effective**
-  **AI Powered**
-  **Scalable**
-  **Easy to deploy**
-  **Searchable Meta Data**
-  **VMS Integration**

AerWatch® unifies customer analytics, security, and facilities data into a real-time situational awareness platform for retail precincts. Using AI and computer vision on your existing cameras, it delivers live visitor counts and occupancy by entrance, level, and zone so centre management and tenants can act on what's happening now, not last week

Detect loitering, after-hours presence, perimeter breaches, and suspicious behaviours across the floor, back-of-house, and car parks with instant alerts to security teams. Monitor crowd density, queue build-ups, slip/fall indicators, and emergency egress to reduce risk and accelerate response.

Track usage of elevators, escalators, amenities, and car-park entries to drive predictive maintenance and right-time cleaning. Restroom traffic and food-court occupancy inform rota planning and service levels, while occupancy-driven triggers can help optimise HVAC and energy use.

Deploy privacy controls (optional face redaction, role-based access, configurable retention) and audit logs to meet policy and regulatory needs. **AerWatch®** plugs into your current VMS and access control systems, and supports edge, on-prem, or hybrid deployments without major hardware changes.

TRUSTED BY:

AerWatch® Benefits for Shopping Malls:

Measuring:

Accurate Customers Counting & Demographics

Waiting Time & Service Time

Customers Engagement

Facilities' Utilisation

Heatmaps Showing Dwell Time

Detecting Threats:

Restricted Areas

Slips & Falls

Loitering

Shoplifting

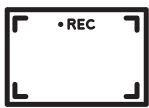

Vandalism & Defacing

IP Cameras

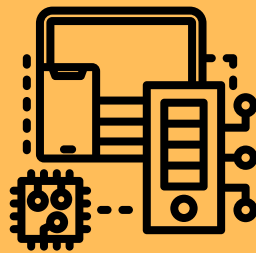

Existing VMS

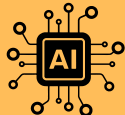

Recorded Videos

Body-worn Cameras

AerWatch Suite

Artificial Intelligence

ML Models

Self/Adaptive Learning
