Aperio's advantages

- Globally available technology
- Easy integration with most Electronic Access Control (EAC) systems
- Simple and quick installation, without cabling
- You continue using your existing credentials (smartcards, fobs and/or phone)

Expand Your New Or Existing Access Control System Without Wiring Doors

Integrate more doors into your existing access control system by adding Aperio battery-powered locks

Installing traditional access control doors is costly due to extensive wiring requirements, limiting security coverage to high-priority doors. Other doors retain mechanical locks, lacking monitoring and management capabilities. A lost master key poses a significant security risk. Aperio technology offers a solution: wirelessly equipping doors with integrated RFID and mobile readers, seamlessly integrating them into your access control system. This enhances control, adapts to organizational changes, and streamlines security management.

Users carry a single credential (RFID, mobile, wearable) for all access needs, simplifying the process.

Communication hub

Control up to 64 doors* with the Aperio communication hub for indoor use. Easy and cost-effective to install, the hub is the nexus between the Aperio devices and the EAC system.

Communication happens in real time.

For more information, please refer to page 46

* Access control panel dependant.

Aperio Product Overview

	High Security* Door	Medium Security Door	Standard to Medium Security Door
	AU100	E100	H100
Device	Wireless lock with RFID reader, keypad, and Seos mobile credential support.	Wireless escutcheon with RFID and Bluetooth reader, compatible with Seos mobile credentials.	Wireless handle with RFID and NFC/Bluetooth reader.
Usage	Suitable for internal and semi-protected outdoor doors, e.g., high-traffic areas like office entrances or restricted zones.	Ideal for internal and medium to high-traffic doors, such as commercial buildings, offices, or schools. It integrates seamlessly with access control systems.	Ideal for interior doors in offices, meeting rooms, archives, and other spaces requiring secure access control.
Ease of installation	Retrofits existing mechanical Lockwood mortice locks (compatible with 3772 and 5782 series) without modifying the mortice.	mechanical 3772 series mortice locks, without requiring additional door modifications.	No additional drilling or cabling is required; retrofits easily onto existing mechanical lock cases (8mm spindles, such as the Lockwood mortice locks).
Power	Battery powered (4 x AA), supporting up to 40,000 operations, with a battery life of approximately two years. Battery low warnings are sent to the access control system.	Battery powered with a lifetime of up to 40,000 operations (using a lithium CR123A battery). Battery low warnings are sent to the access control system.	Battery: 30 openings per day for 50 months
Multi-authentication	Yes: Supports RFID credentials, Seos mobile access, and PIN via a capacitive keypad.	Supports RFID credentials and Seos mobile access, with the ability to integrate Bluetooth for mobile credentials.	credentials, including MIFARE Classic, iCLASS, and Seos, as well as mobile credentials via NFC/Bluetooth.
Credentials	Supports multiple high-frequency RFID technologies such as Mifare Classic/Plus, iCLASS, DESFire, Seos and LEGIC and mobile technologies (NFC and BLE).	Supports multiple high-frequency RFID technologies such as Mifare Classic/Plus, iCLASS, DESFire, Seos and LEGIC and mobile technologies (NFC and BLE).	Supports multiple high-frequency RFID technologies such as Mifare Classic/Plus, iCLASS, DESFire, Seos and LEGIC and mobile technologies (NFC and BLE).
Status information	• Door position (open/closed) • Bolt position (secured/unsecured) • Key override support • Handle position (Rex monitoring for egress)	- Wireless communication with 5-10 seconds heartbeat. - Local storage of up to 200 events for audit trails. - Door position and lock status monitoring.	- LED indicators for operation feedback (red/green/orange). - Wireless communication with the access control system. - Offline/online operation modes, including the Aperio Standard OSS Offline mode.
Accessories	Keypads, wireless hubs, and spindles are part of the solution.	Includes USB interface for electronic configuration.	U-handle option available along with various other mechanical hardware choices.
Certification	Fire rated (Australian Standard AS1905.1 for fire doors), compliant with Australian Lock Standards for security and durability, as well as European electrical compliance standards.	Compliant with Australian standards for security, fire safety, and durability (AS4145.2:1993 and AS1905.1:2005).	Certified according to Australian standards (CE, UKCA, and EN1634 for fire safety).
Feedback	LED indicator and audible buzzer for user feedback.	Provides visual and audible feedback via LED and buzzer.	LED provides visual feedback for authentication and operation status. This wireless handle provides a cost-effective and seamless solution for upgrading to access control without extensive installation requirements
Smart Credential Cache	Up to 1000 users can be granted access even if the EAC is temporarily down.		
Operation	All products can run in online and offline* (OSS included) mode.		

Aperio Product Overview

	Standard to Medium Security Door	Medium security, high traffic doors	Medium security, high traffic doors	Medium Security Cabinet Door	Standard to Medium Security Opening
	C100	DR100	ES100	KL100	P100
Device	Cylinder with RFID and NFC/Bluetooth reader.	Wall-mounted reader with secure relays, RFID and NFC/BLE-enabled for high-traffic doors.	Wireless Wall mounted reader with Battery powered strike RFID and NFC/ BLE-enabled for high-traffic doors.	Cabinet lock with RFID and NFC/ BLE reader.	Wireless padlock with RFID and NFC/Bluetooth reader.
Usage	Ideal for internal doors like offices, meeting rooms, and server cabinets, with no drilling or cabling required.	Designed for high-traffic doors such as entrance doors, turnstiles, overhead doors, loading bays, and roof access points.	The Aperio ES100 is a wireless integrated electric strike designed to retrofit doors with real-time online access control, making it a versatile and cost-effective solution for upgrading security systems without extensive wiring.	Suitable for lockers, drawers, cupboards, and other interior cabinet applications in environments such as hospitals, offices, retail, and staff lockers.	Designed for securing non-standard openings such as toolboxes, storage cages, and containers. Suitable for outdoor and rugged environments thanks to its IP66 rating, ensuring weather and dust resistance.
Ease of installation	- No additional drilling or cabling required, designed to retrofit existing mechanical doors. - Compatible with standard Lockwood Australian oval 570 series cylinders, making installation straightforward.	Minimal drilling, i- Minimal drilling required. - Interconnecting cables are used for simple integration. - Powered by a 12-24 VDC power supply, suitable for quick retrofitting into existing systems.	The Aperio ES100 is widely recognized for its ease of installation, making it a popular choice for retrofitting doors with wireless access control	- No additional drilling or cabling required. - Can be installed on metal or wooden doors with standard cutouts (18/22 or 16/19 mm). - Supports both left and right-handed cabinet openings and can be installed vertically to secure drawers.	- No drilling or cabling required. - Can be easily swapped with mechanical padlocks, providing a quick upgrade to digital access control.
Power	Powered by a lithium CR2 battery, offering up to 30,000 operations (approximately two years of use).	Requires a 12-24 VDC power source for operation.	The Aperio ES100 is powered by two AA lithium batteries, delivering up to 45,000 access cycles per set, it includes a microUSB port for emergency power, making it a highly efficient and easy-to-install solution for retrofitting doors with real-time access control.	Powered by a single CR123A lithium battery, which supports up to 40,000 operations or several years of usage.	Powered by a single CR2 lithium battery, supporting up to 30,000 operations or approximately 2 years of usage under normal conditions.
Multi-authentication	Yes: Supports RFID and mobile credentials (NFC/Bluetooth).	Supports RFID and mobile credentials (NFC/Bluetooth) for secure access control.	Supports RFID and mobile credentials (NFC/Bluetooth) for secure access control.	Supports a variety of credentials, including RFID cards, NFC-enabled smartphones, Bluetooth, and other mobile credentials.	- Provides real-time status feedback through LED indicators (red/green/orange) showing access granted/denied, tamper detection, and battery status.
Credentials	RFID Credentials: ** - MIFARE Classic® - MIFARE Ultralight® - MIFARE® DESFire® - MIFARE Plus® - iCLASS SE® - iCLASS Seos® - iCLASS Seos Elite® - **Mobile Credentials: ** - NFC-enabled mobile credentials. - Bluetooth for mobile access via smartphones.	RFID Credentials: - MIFARE Classic®, - MIFARE DESFire®, - iCLASS SE®, - iCLASS Seos® - HID Mobile Access (BLE and NFC). - Mobile Credentials: - NFC and Bluetooth-enabled mobile credentials for access using smartphones and compatible devices.	RFID Credentials: - MIFARE Classic®, - MIFARE DESFire®, - iCLASS SE®, - iCLASS Seos® - HID Mobile Access (BLE and NFC). - Mobile Credentials: - NFC and Bluetooth-enabled mobile credentials for access using smartphones and compatible devices.	- RFID Credentials: - MIFARE Classic® - MIFARE DESFire® - iCLASS SE® - iCLASS Seos® - Mobile Credentials: - NFC-enabled mobile credentials. - Bluetooth for mobile access via smartphones.	- RFID Credentials: - MIFARE Classic® - MIFARE Ultralight® - MIFARE® DESFire® - MIFARE Plus® - iCLASS SE® - iCLASS Seos® - iCLASS Seos Elite® - Mobile Credentials: - NFC and Bluetooth-enabled credentials via smartphones.
Status information	LED indicators (red/green/orange) provide feedback on lock status and battery life. Battery low warnings are communicated to the access control system. Tracks events and credential, with data stored locally for audit purposes.	- Provides status feedback such as: - Door position (open/closed) - Tamper detection - Request to exit (REX) input.	- The Aperio ES100 features a bi-color LED indicator that provides visual feedback on lock status and system activity using red, amber, and green lights. It also supports real-time monitoring of door position, lock state, tamper events, battery health, and request-to-exit signals.	- Provides real-time feedback through built-in LED indicators (red/green/yellow) for access granted or denied, tamper detection, and battery status monitoring.	- Provides real-time status feedback through LED indicators (red/green/orange) showing access granted/denied, tamper detection, and battery status.
Accessories	Rubber cover sleeve for added protection.	No additional accessories required, though optional features like additional power supplies or connectors may be added for specific environments.	- Accessories include interchangeable faceplates and adjustable shims for compatibility with different door types, monitored kits like the MH Security Kit for latch and door position monitoring, and request-to-exit capabilities, and offers tamper-resistant strike bodies in multiple depths.	- Different cam options are available depending on specific application needs (e.g., straight cam or long throat for timber doors).	- Aperio Hubs (AH30 and AH20). - Battery change tool: tool for replacing CR2 lithium battery. - Optional Override Credentials: Up to 10 override credentials can be set up for emergency access in case of communication failure.
Certification	CE, UKCA, EN 15684:2012 Compliant with CE, UKCA, EN 15684:2012 (1680AF30), and fire-rated according to EN 1634 for doors up to 90 minutes.	Compliant with CE and UKCA standards, providing reliable and certified performance in security environments.	Compliant with CE, UKCA, RCM, R-NZ.	Certified under CE and UKCA standards, ensuring its compliance with security and operational requirements.	Certified with CE, UKCA, and RCM standards, ensuring its compliance with security and performance requirements.
Feedback	LED indicators provide visual feedback (red/green/orange) for lock status.	Includes LED status feedback to visually indicate the lock's state.	Includes LED status feedback to visually indicate the lock's state	LED Indicators and Battery Feedback	- LED indicators provide visual feedback on the lock's status, battery life, and access attempts, making it easy for users and administrators to monitor its functionality.
Smart Credential Cache	Up to 1000 users can be granted access even if the EAC is temporarily down.				
Operation	All products can run in online and offline (OSS included) mode.				

Aperio is Ready for Both Offline and Online Integration

Aperio Online Integration: Door Monitoring in Real Time

Aperio Online integrations offer real-time lock-to-system, instant audit trails and remote locking/unlocking function. Online integration puts you in total control of access and equips you to react quickly to any emergency. When integrated online, Aperio locks connect with your system via a range of different Communication Hubs to control up to 64* doors within a range of 25 metres.

Online Aperio locks are compatible with all standard RFID technologies. Online integration provides the option to cache 1,000 valid credentials.

Aperio Offline Integration: Access Rights On Card via Updater

Aperio Offline locks are installed wire-free and integrate seamlessly with a new or existing access control system*. Individual lock and user permissions updates may be completed remotely or locally, via the update readers. For maximum compatibility with new and existing systems, Aperio Offline locks accept most RFID technologies, incorporating audit trail support. With Aperio, you can also combine Offline and Online doors within the same installation.

Aperio Offline locks support both ASSA ABLOY Offline and OSS Standard Offline protocols, guaranteeing interoperability with a broad range of access systems.

Extend Your Favourite Access Control Features To More Doors

Aperio has integration in its DNA, making it easy to extend the reach and capacity of your access control without wiring. Doors previously secured with mechanical locking can now be integrated into an access control system and unlocked with the same credentials.

Aperio-equipped access points are managed from the existing system software interface. Over 130 access control manufacturers globally have already integrated battery-powered Aperio locks to work seamlessly with their system, ensuring you benefit from all supported EAC features.

Multi-RFID Technology

The ability to use different RFID card technologies within the same system.

Aperio devices supporting this feature

The entire Aperio product family

Online/Offline Transition*

Seamless transition between the two modes without the need to replace or modify locks.

Aperio devices supporting this feature

The entire Aperio product family

Unlimited Users

There is no limit to the number of users who can open a door. This number is set by the access control system.

Aperio devices supporting this feature

The entire Aperio product family

Remote Opening

The remote opening function offers the ability to remotely lock or unlock a door. It allows authorized individuals to grant access to a secured area without physically being present at the entry point.

Aperio devices supporting this feature

The entire Aperio product family

* Panel dependant.

Emergency Code

Emergency (or Duress) code is a security feature designed to protect individuals in potentially dangerous situations.

With Emergency Code enabled, a silent hold-up alarm triggers in the security centre if, in a threatening situation, a credential-holder uses their access card along with an attack code instead of her/his own PIN.

Aperio devices supporting this feature

Aperio PINpad devices:
E100 wireless escutcheon and
AU100 wireless lock.

Use Cases

Emergency situations

Operation During Access Control Panel Breakdown

Aperio offers several smart credential handling options to enable access in case of a communications failure with the access control system.

Up to 1000 users can be granted access even if the Access Control Panel is temporarily down.

Aperio devices supporting this feature

The entire Aperio product family

Use Cases

Retail stores or warehouses,
medication storage rooms or
laboratories, server rooms or
equipment racks

Four Eyes Rule

The 'four eyes rule' is a practice that requires the presence of at least two authorized users with two different credentials each to unlock a door. It can be a combination of a card/phone + PIN or two cards/phones. The number of users and number/combination of credentials is configured by the EAC system.

Aperio devices supporting this feature

The entire Aperio product family

Use Cases

Sensitive or high-security environments
When access to critical areas, systems, or data must be reviewed and approved by a second authorized person.

Escape and Return

This feature allows a user to temporarily leave a secure area or room and then return without having to repeat the full authentication process. This feature is often implemented to provide convenience to authorized individuals who need to briefly exit and re-enter a restricted area without compromising security.

Aperio devices supporting this feature

E100 wireless escutcheon

Use Cases

Emergency situations,
short breaks

Electronic Privacy

Also known as 'Do Not Disturb', this feature restricts access to an area. When the electronic privacy button is pressed or enabled, it allows the user to restrict access into the area. When engaged, the EAC may still grant access to specific users.

rooms

Everybody benefits from Aperio Wireless Access Control

Building access control impacts multiple stages and stakeholders

Business owners, security staff, and facility managers have an extensive portfolio from which to select the optimal digital access solution that meets individual requirements, ensuring low energy consumption and minimal maintenance, plus optional services when needed.

OEMs, system integrators, and installers gain from our top-tier technologies for new installations or digital access upgrades, unparalleled standards expertise, and the broadest selection of wireless access hardware.

Users benefit from the convenience and safety provided by our digital access solutions every day, enhancing their experience in the building from installation through to daily use.

For architects and specifiers, integrating modern design aesthetics and green building practices is a key concern from the design phase. Aperio devices can help them achieve their goals.

Aperio AU100 Wireless Lock

Aperio AU100 Wireless Lock

Technical information

The cost-effective solution for doors with demanding access control requirements

The ASSA ABLOY Aperio AU100 is the most complete electronic wireless security lock on the market. It works with almost any system, via Online, Offline or OSS-standard offline integration.

Versions:

AU100-530

AU100-3772

AU100-5782

Easy integration

Aperio AU100 works seamlessly with access control systems integrated with Aperio via the AADP protocol or Wiegand hub. No database integration required.

Highly effective safety and security protection

Rated IP55, D8, S8.

Multi-authentication

AU100 adds an extra layer of security to your opening with keypad functionality (only supported by Aperio Online)

Monitoring

Integrated sensors for door (open/closed); Handle status detection (request to exit).

Convenience

Aperio AU100 reads industry-leading RFID credentials, as well as mobile (NFC).

- To change the spindle; special tools may be required

Aperio H100 Wireless Handle

Aperio H100 Wireless Handle

Technical information

Powerful access control inside an award-winning slimline door handle

The ASSA ABLOY Aperio H100 is the easy, aesthetically pleasing way to upgrade access control: It is fitted without wiring or drilling at the door and works with almost any system, via Online, Offline* or OSS-standard offline integration.

Inbuilt LED instantly communicates if access is granted or denied.

Discreet handle with minimal footprint and contemporary design.

U-handle adapter available as an accessory.

Inside handle always engaged.

All electronics and functionality are inside the outer part of the handle.

Finishes:

Satin Pearl or Matt Black

*Panel dependant

Easy integration

Aperio H100 works seamlessly with access control systems integrated with Aperio via the AADP protocol or Wiegand hub. No database integration required.

Quick installation

It takes a few minutes to swap a mechanical handle for an Aperio H100.

Flexibility

Can be used with the most common Scandinavian and Finnish mortise locks – in wooden, steel, and tubular frame doors (and glass doors with standard lock cases).

Convenience

Aperio H100 reads industry-leading RFID credentials, as well as mobile (NFC and BLE).

Aperio C100 Wireless Cylinder

Aperio C100 Wireless Cylinder

Technical information

The non-disruptive way to extend access control

The ASSA ABLOY Aperio C100 is the quickest way to upgrade access control: It is fitted without wiring or drilling at the door and works with almost any system, via Online, Offline* or OSS-standard offline integration.

Metal single knob cylinder
Australian profile – for use in
indoors.

Main electronics (RFID + radio)
in the external knob – secure
electronics inside cylinder core.

Freely rotating lock cam.

Inbuilt LED instantly
communicates if access
is granted or denied.

Real time access control

Users enjoy real-time access control, meaning credentials can be updated instantly without physical rekeying.

Quick installation

Quick and non-invasive installation, minimizing disruption and downtime

Seamless entry

The C100 supports mobile and card-based access, offering a seamless and modern entry experience.

Convenience

Its battery-powered operation ensures reliability even during power outages, and the visual LED indicators provide clear feedback on door status, improving user confidence and ease of use.

Aperio ES100 Wireless Reader & Integrated Strike

Aperio ES100 Series Wireless Electric Strikes

Technical information

The The ES100 Series Wireless Electric Strikes make online access control simple and affordable.

2.4 GHz Aperio wireless technology

Integrates with existing access control systems and credentials

Audit trail limited by access control system

SecuriCare three-year, no-fault, no questions asked warranty

Battery operated for stand-alone operation

Flexibility

Universal compatibility with traditional electromechanical locking devices

Easy integration

Aperio ES100 works seamlessly with access control systems integrated to Aperio via AADP protocol or the Wiegand hub. No database integration required.

Easy installation

Easy surface-mounted, no-cut installation

Convenience

Aperio ES100 reads industry-leading RFID credentials, as well as mobile (NFC and BLE).

Aperio KL100 Wireless Locker/Cabinet Lock

Aperio KL100 Wireless Locker/Cabinet Lock

Technical information

Wireless protection for your lockers and cabinets

The ASSA ABLOY Aperio KL100 is the easiest way to upgrade access control at many openings beyond doors. It is fitted without wiring or drilling the cabinet door and works with almost any system, via Online, Offline or OSS-standard offline integration.

Battery, located inside the door, is easy to replace in seconds with a single screw.

Discreet, with a minimal visual footprint and contemporary design.

Inbuilt LED instantly communicates if access is granted or denied.

Several cams available.

Four locking positions for both cabinets and drawers.

Four lock versions available to fit metal and wooden doors.

Easy integration

Aperio KL100 works seamlessly with access control systems integrated with Aperio via the AADP protocol or Wiegand hub. No database integration required.

Quick installation

It only takes a few minutes to swap a mechanical cylinder for an Aperio KL100.

Flexibility

Ideal for retrofit projects, KL100 allows you to tailor your solution with a wide range of cam types.

Aperio Communication Hub

Aperio Communication Hub

Technical information

Communication happens in real time

Control up to 64* doors with Aperio communication hubs for indoor use. Easy and cost-effective to install, the hub is the nexus between Aperio devices and the EAC system.

Communication between hubs and Aperio devices happens in real time. Encrypted radio communication.

Integrated antenna with the option to mount an external antenna.

The hubs are easy and cost-effective to install.

Built-in tamper switch. Detection of removal from bracket.

The range of transmission to Aperio devices is up to 25 m.

Event Log in the hub.

For standard electrical installation boxes with 60mm fixing screw distance. They fit in standard flush-mounted boxes.

The user receives a quick overview of the status of the hub and locks connected via an LED signal pattern (communication, activation, status, etc).

Firmware upgrade possibilities.

AH40 Gen5 Communication Hub

- For connection to EAC system
- TCP/IP communication encrypted using TLS 1.1/1.2
- Control up to 64 locks
- PoE (Power over Ethernet) or external power supply

AH30 Gen5 Communication Hub

- Connection to the EAC system via RS485 bus (addressable)
- Control up to 16 locks

AH20 Standard Wiegand Gen5 Communication Hub

- 1-to-1 communication
- For connection to EAC system via Wiegand interface
- Compatible with most access control systems – no protocol integration needed

AH20 Advanced Wiegand Gen5 Communication Hub

- 1-to-1 communication
- For connection to EAC system via Wiegand interface
- Compatible with most access control systems – no protocol integration needed
- Four specific function relay outputs: These relay outputs can be connected to the controller.
