

Security on a continuum

Genetec™ Security Center SaaS is a unified physical security solution that is offered as a service and deployed on a hybrid-cloud architecture. It combines access control, video management, forensic search, intrusion management, automation, and many other advanced security capabilities.

Overview

Security Center SaaS is a unified cloud-based software as a service (SaaS) physical security solution. It combines enterprise-grade capabilities, an open partner ecosystem, massive scalability, and the highest levels of cybersecurity, privacy, and reliability. It also speeds up deployments and removes management and maintenance complexities.

Rapid elasticity

Grow and pivot with more agility, and rapidly spin up new sites anywhere in the world. Scale users, storage, resources, and more through the cloud, independently of your site-based hardware capacity and without impact on performance or extra effort on your end.

Unlimited connectivity

Monitor, respond, and keep track of all security operations how and where you want, via web, mobile, and desktop applications. Benefit from increased flexibility and collaboration, without sacrificing efficiency and reliability.

Frictionless transition

Leverage existing devices and infrastructure, ensuring a frictionless transition to connected and cloud-managed solutions. Secure your organization's investment and maximize your readiness for tomorrow's innovations.

Key features

General

- ✓ Cloud head-end
- ✓ Fully open architecture with web API
- ✓ Wide ecosystem of supported devices
- ✓ Cloud-managed appliances and direct-to-cloud devices
- ✓ Cybersecure end-to-end encrypted communication, and redundant cloud storage
- ✓ Event and alarm management
- ✓ Federation™
- ✓ Mobile app for easy remote monitoring and quick incident response on the go
- ✓ Advanced operations via desktop and web application
- ✓ Supports single sign-on (SSO)
- ✓ Automated updates and maintenance

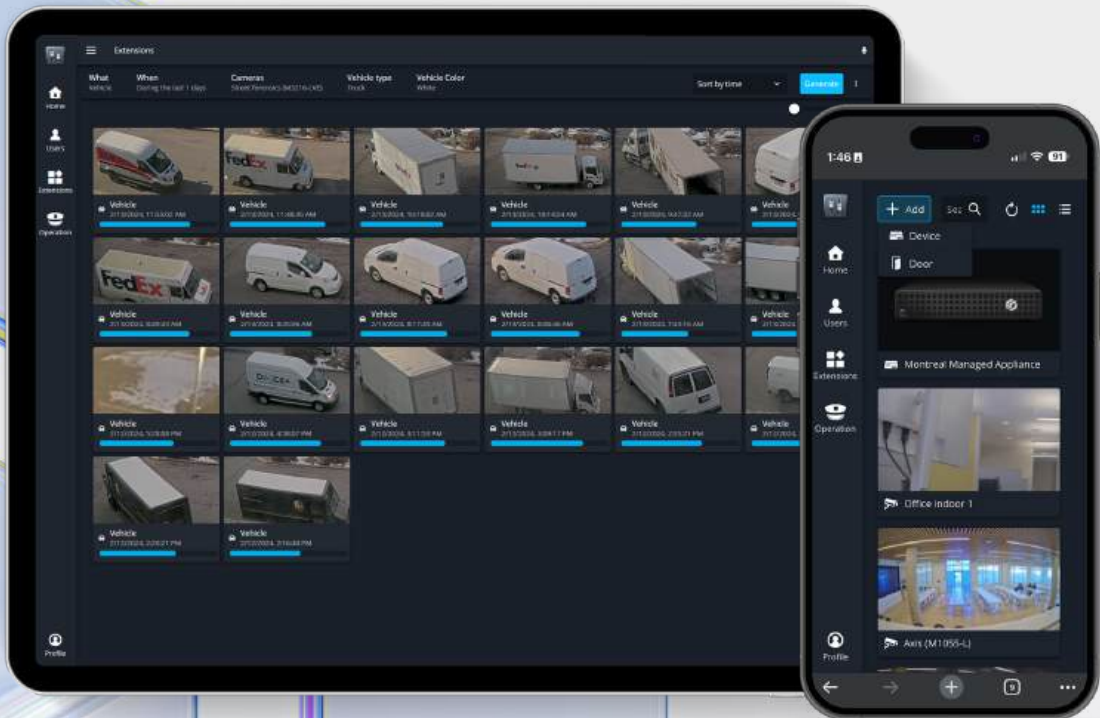

Key features

VSaaS

- ✓ Cloud and edge recording
- ✓ Uninterrupted streaming of live or playback with redundancy for mission critical operations
- ✓ Edge analytics
- ✓ Video privacy
- ✓ Forensic search
- ✓ Bookmark, snapshot, and export video

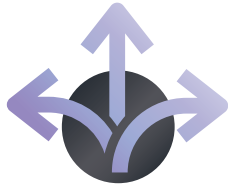

ACaaS

- ✓ Door and cardholder activity monitoring
- ✓ Network door controllers (such as Axis Powered by Genetec) and managed devices
- ✓ Access control events, reporting, and audit trails
- ✓ Cardholder synchronization
- ✓ Synergis™ Cloud Link gateway appliance for non-direct-to-cloud devices
- ✓ Visitor management, occupancy, and mustering
- ✓ Access requests and reviews

Key benefits

How will your organization benefit? Explore the wide range of advantages made possible with Security Center SaaS.

Automated system deployment
for immediate access

Remote management
and upgrades

Continuous delivery and
access to the latest innovation

Intuitive device enrollment
and configuration

The [2025 State of Physical Security Report](#) found that 61% of end users plan to deploy cloud or hybrid-cloud security systems within five years. And 78% of Channel Partners expect to perform more cloud-connected installations in the next 12 months.

Scalability and security

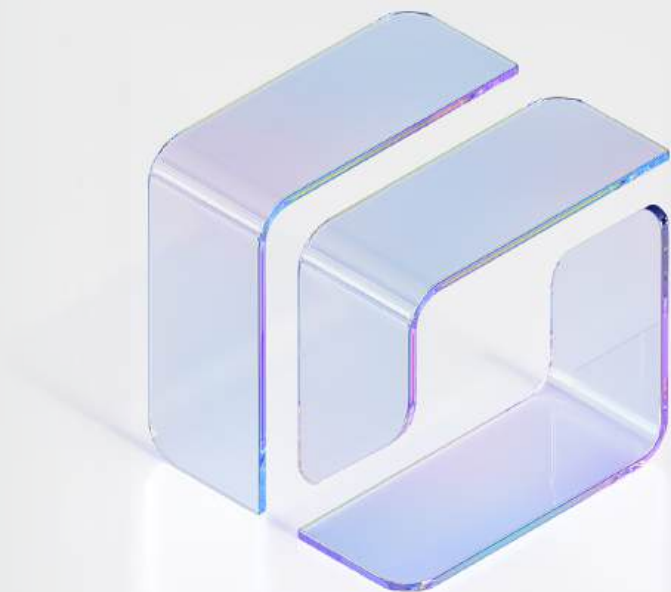

Highly scalable, flexible, resilient, and cybersecure. New functionality and security updates are seamlessly delivered, with no system downtime, leading to a better, disruption-free experience.

Client apps	Choose from a web, mobile, or desktop app to get a unified view of your system from anywhere.
--------------------	---

Managed appliances	Connect downstream devices to a variety of our cloud-managed appliances for a hybrid-cloud deployment. Updates are managed by Genetec so appliances will always be secured and up to date.
---------------------------	--

Direct-to-cloud devices	Connect cameras and door controllers directly to Security Center SaaS through cloud-native services and secure communication channels. Open architecture allows you to choose hardware that meets individual requirements today and in the future.
--------------------------------	--

On-premises systems	Federate on-premises systems to a new Security Center SaaS deployment or deploy new cloud-connected sites and federate them back into your existing infrastructure.
----------------------------	---

Architecture

Take advantage of our cloud and hybrid deployment types. Experience a quick and trouble-free install of **Security Center SaaS** through our online store, and get the most out of your platform anytime, anywhere with the Genetec Web and Mobile apps.

Cloud deployment

- Low to no deployment appliance footprint
- Fully hosted with automated software and device updates
- Easy device enrollment allows to connect cameras and doors in minutes
- Ideal for retail, banking, and education customers

Hybrid deployment

- Blend of edge devices and cloud-managed appliances, using cloud-based services for processing and maintenance
- Mix of on-premises storage and cloud, while operations and maintenance are done from the cloud head-end
- Move to the cloud at your own pace, one site at a time
- Ideal for healthcare, cities, and organizations with corporate campuses

Subscription plans

Find the Genetec Security Center SaaS plan that best suits your needs:

	Standard	Premium
Unified video and access control	✓	✓
Built-in cybersecurity and privacy	✓	✓
Web, mobile, and desktop applications	✓	✓
Event management and automation engine	✓	✓
Video forensic searches	✓	✓
Federation support	✓	✓
Cardholder synchronization (with Azure AD, SQL server, CSV, and Oracle)	✓	✓
Visitor management, occupancy, and mustering	✓	✓
Access request and access review		✓
Work management		✓
Corporate single sign-on		✓
Rest API		✓
Standard phone support	✓	✓
Access to 24/7 support		✓
