

Safeguarding critical infrastructure

Utilities Security Solutions

security.gallagher.com

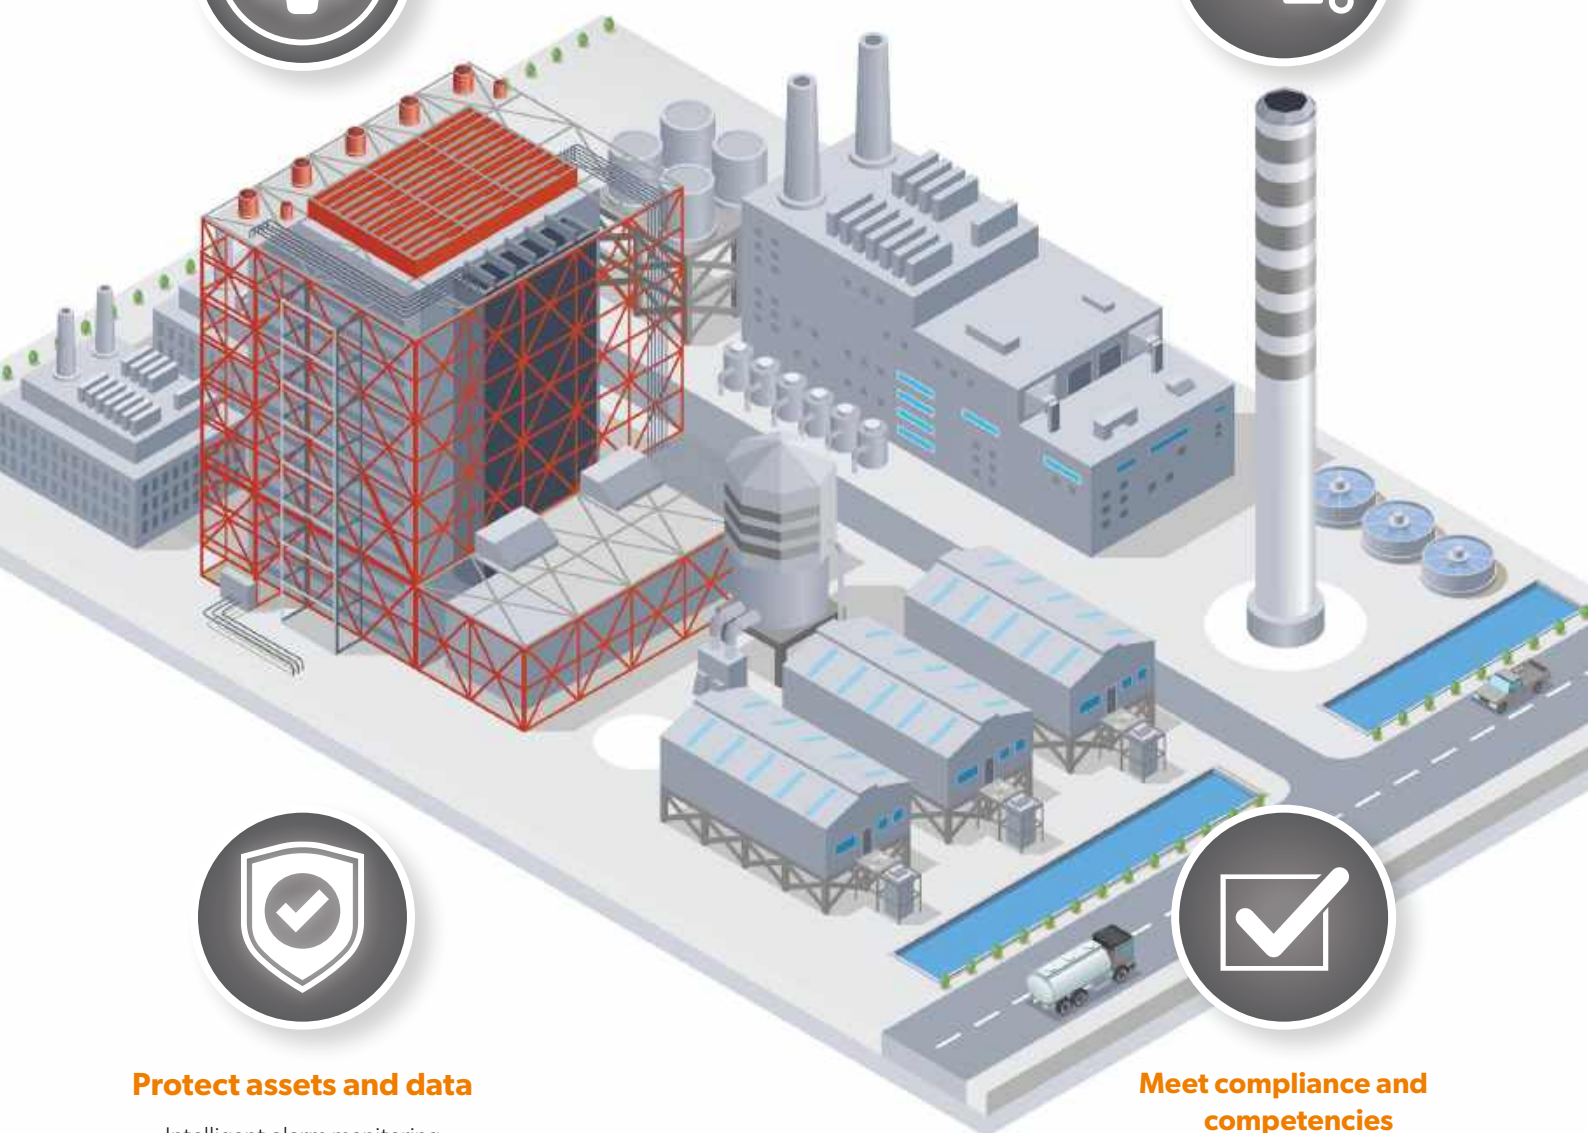

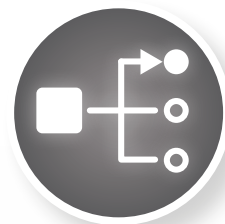

Keep people safe

- Secure site access
- Ensure duty of care
- Emergency management

Optimize facility use

- Simplify administration
- Business efficiency and cost savings
- Future-proof for growth

Protect assets and data

- Intelligent alarm monitoring
- Threat management
- Reduce cyber risk

Meet compliance and competencies

- Regular software updates
- Assured business continuity
- Compliance / Confidentiality

Gallagher's industry-leading integrated security solutions provide complete site control from one central management platform to keep your people safe, ensure the safety of the public, and much more.

Secure site access

Ensure people only have access to areas they are qualified to be in, and effectively manage compliance with your organizational policies and government regulations.

- Ensure your duty of care is met by keeping the public, staff, and contractors safe.
- Configure competency warnings to display important reminders and notifications to staff when they present their credentials at a reader, avoiding potential downtime and saving costs.
- Protect staff with a robust perimeter security system by keeping thieves and vandals off site.
- Check personnel at the door to make sure they are capable, qualified, and compliant with a wide range of standards and regulations.
- Automated and rule based approvals ensure personnel receive access following the correct policies and competencies, increasing compliance and peace of mind.

Rapid evacuation and lockdown

Gallagher Command Centre helps you respond swiftly and accurately during emergency situations such as fire, natural disaster, or terrorism.

- Secure site quickly and simply with the push of a button to notify staff, contractors, and visitors when an incident occurs.
- Identify, locate and respond to potential risks and unauthorized intrusions in a timely manner, even on disparate sites in remote locations.
- Notify people of changing threat levels using building intercom systems and Broadcast Notifications to mobile phones and email. Send instructions and updates to staff, with different messages based on where they are on site.
- Remain aware of your staff and visitor locations in real-time using Tag Boards and Mobile Evacuation.

Protect assets and data

Ensure operational continuity and avoid significant costs associated with loss of supply by protecting your site's assets from theft and damage

Protect assets

Gallagher's intelligent access control and perimeter solutions provide management and protection for valuable assets and resources on your site.

- Control access to restricted areas with valuable assets such as: telecommunication towers, electricity transmission equipment, water/wastewater systems, and fuel facilities.
- Perimeter guard patrols can be reduced or redeployed to areas of greater need.
- Supervise access to restricted areas with intelligent alarm monitoring and advanced site map functionality.
- Use zone counting to monitor the number of people in an area on site.
- Deter, detect and respond to unauthorized entry on site with our perimeter detection solutions.
- Centralize oversight of every asset, no matter how remote, within a single management system, ensuring consistent policies, procedures, and monitoring are applied enterprise-wide.

Reduce cyber risk

At Gallagher, our solutions are designed from inception to be as cyber secure as possible. We continuously evolve our solutions to meet the changing threat at a software and physical level, building in robust cyber security at every stage.

- Reduce cyber security risks through Gallagher's end-to-end encryption and user authentication.
- Identify potential vulnerabilities within your system using Gallagher's Security Health Check, allowing you to proactively manage and respond to new and evolving security risks.
- Implement regular software and hardware updates across all devices to stay current with cyber threats and effectively manage obsolescence.
- Receive expert configuration advice to deploy the system in a secure environment, and a Gallagher hardening guide to further strengthen each component.
- Gallagher carries out internal and external penetration testing during development to identify vulnerabilities before updates or new solutions are released.

“

The Gallagher system offers a huge range of safety features. The most critical one for us, is how quickly it allows us to respond to an evacuation. Having a quick and easy process makes all the difference.

Lee Paterson, Technical Lead Contact Energy

”

Optimize facility use

Gallagher Command Centre allows you to efficiently manage multiple sites and buildings, each with different requirements, from one centralized system. Gallagher solutions optimize facility use and reduce unnecessary overheads by improving facility management and energy consumption.

Business efficiency and cost savings

Gallagher's integrated security solutions allow you to manage site security, control building management systems, and increase system efficiency – reducing operational and training costs, energy use, and utility costs.

- Avoid significant costs associated with business interruption through security breaches, theft and vandalism.
- Avoid heavy fines associated with failing to deliver upon agreed service levels with customers.
- Remote monitoring of multiple sites from a single platform allows business owners to be in full control of their security solution (perimeter and access control), controlling downtime while significantly reducing theft, vandalism, and damage.
- Improve staff efficiency with less time spent responding to false alarms.
- Save money and minimize human error by reducing the need for guard patrols.
- Reduce administration time with easily customized, accurate and timely reporting
- Remove the need for manual perimeter inspections using perimeter status reporting

Future-proof for growth

Implement a comprehensive yet flexible security solution with the ability to easily scale the solution, while remaining centrally managed.

- Highly flexible and scalable solution allows for future expansions and upgrades on site.
- Ability to integrate with human resource management systems makes it easier to manage two systems during a migration process.
- Reduce costs during upgrades with the flexibility to use existing cabling infrastructure.

Meet compliance and competencies

Implement, enforce, and report on business policies and processes at every point using physical security infrastructure and Command Centre.

Ensure compliance and manage competencies

Gallagher Command Centre effectively ensures cardholders are meeting a wide range of organizational policies and government regulations, such as First Aid certifications, Electrical Licenses or insurance documents.

- Integrated access control in highly secure areas where HR and SMS data automatically check competencies and enforce compliance with regulations and standards.
- Real-time audit trail provides prompt and reliable decision-making information.
- Use random cardholder selection to check competencies and licensing, as well as drug and alcohol testing.
- Monitor inductions, licenses, training, and qualifications to only allow people access to areas they are sufficiently qualified to be in.
