

AXIS W401 Body Worn Activation Kit

Automatic activation of body worn cameras

AXIS W401 Body Worn Activation Kit , with its small, streamlined form, this device fits seamlessly into tight spaces, simplifying installation wherever space is limited. It allows for automatic activation of recording on all body worn cameras within the same system, triggered by I/O inputs such as lightbar or siren activation, a panic button press, fire alarms, or any MQTT events ensuring critical moments are always captured during escalated incidents.
