Using the app

(1) Arm/Disarm button

- Alarm panel can be armed or disarmed using this button.

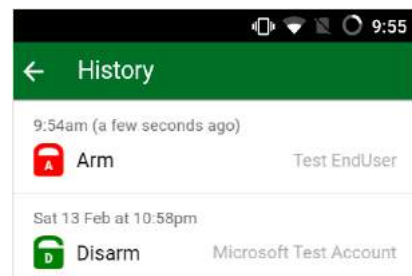

FAQ: Alarm panel is armed/disarmed but the lock does not stop spinning?

The lock will keep spinning:

- Until the app receives Arm/Disarm acknowledgement from the control room.
- On most alarm panels this occurs at the end of exit delay.

(2) Arm/Disarm history button

- History page displays arm/disarm with time stamp and user name.

(3) Setting PIN lock

- PIN lock can be enabled within the Account page.
- For an iPhone with TouchID, fingerprint lock can also be enabled within Account page.
