

# AXIS Forensic Search for Genetec

## Axis devices accelerate forensic search in Genetec

AXIS Forensic Search for Genetec accelerates forensic investigations by enabling efficient search, recovery, and sharing of video evidence. It uses motion object tracking and object classification metadata to enable accurate identification without the need for any servers. This means you can search for specific motion or objects in an area of the scene. Seamlessly integrated with Genetec, search results can be easily extracted, managed, and shared as video evidence. It's also integrated with Genetec's data visualization which helps improve response and analysis times.

- > **Forensic search without analytic servers**
- > **Metadata search for objects, people, and incidents**
- > **Easily filter search results**
- > **Quickly and securely share video evidence**
- > **Available as free download**

# AXIS Forensic Search for Genetec

## System features

<b>Supported devices</b>	<p><i>To filter by motion object tracking:</i> All Axis cameras with firmware 9.50 or later</p> <p><i>To filter by object classification:</i> All Axis cameras with firmware 10.6 or later running AXIS Object Analytics</p>
<b>Forensic search</b>	Used advanced filtering to search based on motion in a scene Use advanced filtering to search based on object classification from AXIS Object Analytics
<b>Filters</b>	Time Area in scene/region of interest Camera Object type
<b>Snapshots</b>	Search results show zoomed in snapshots of the detected objects

## System requirements

<b>Technical requirements</b>	Genetec Security Center, version 5.10 or later with latest driver pack from Genetec
-------------------------------	---

AXIS Forensic Search for Genetec integration  
Supported devices from Axis

<b>Supported platform versions</b>	Always verified and tested with latest platform versions
------------------------------------	--

## Installation and maintenance

<b>Install</b>	Install on both server and client machines
<b>Licenses</b>	Add and activate plugin by contacting Genetec to add the part number "GSC-1SDK-AXIS-ForensicSearch" to your license

## General

<b>Languages</b>	English
<b>Support</b>	Fully supported by Axis Designed and validated to work optimally with Genetec
