Security Center SaaS edition

Starting a new venture, kicking off a project or opening new offices are all exciting milestones in the history of any business. However, these milestones don't come without their challenges when considering the capital resources involved in acquiring a security solution throughout the lifecycle of your business.

The Security Center SaaS edition makes it easier to purchase, deploy and maintain your security system without putting a strain on your resources. It can help you minimize risk, keep resources aligned and manage your growth with confidence.

Genetec™

Focus on your business, not your infrastructure

The Genetec Security Center SaaS edition lets you move to the cloud at your own pace. Whether your system is deployed on-premises, in the cloud, or somewhere in between, the Security Center SaaS edition delivers a steady flow of innovation that provides ongoing value to help you focus on your business.

Transition to the cloud

· Scale faster
· Secure storage
· Reduce maintenance
· Access value-added services

Access the latest innovations

· Secure your system
· Get the latest updates
· Talk with our experts
· Try our most popular features

Bring flexibility to your budget

· Scale up or down
· Lower your upfront costs
· Work with a predictable budget
· Buy on monthly or annual terms

# Deploy the SaaS edition your way
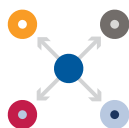

Fully hosted

The Security Center SaaS edition lets you move your access control and automatic license plate recognition (ALPR) to the cloud. The Synergis™ SaaS edition makes it easier to deploy access control throughout an organization and allows you to focus on what matters: securing the flow of people. With AutoVu™ Managed Services, our experts ensure your ALPR system maintains high uptime and is always up to date with the latest features.

Hybrid

If you're not ready to go all in with cloud, the Security Center SaaS edition lets you deploy your core components on-premises and enhances your security with value-added services in the cloud, such as the System Availability Monitor and the Genetec Update Service. And with our upgrade assistance you can continue to receive the same level of service as hosted deployments.

Upgrade assistance

What is it?
Dedicated assistance for system upgrades of hybrid deployments.

Who can benefit?
Users on an annual contract or users who have been on the SaaS edition for at least 12 months.

What's included?
· Remote assistance during the system upgrade

· Support of the upgrade in production

· Optimization of system configuration and more…

Comparing the Security Center SaaS edition
