

Get mobile with your Challenger system with the Tecom[®] Mobile app.

Tecom Mobile allows users to perform the most important keypad functions on their favourite digital device.

The simple but powerful interface allows you to open doors, arm/disarm areas, isolate inputs or control lighting. You can also view panel history and outstanding alarms on all of your popular digital devices.

Tecom Mobile will directly display access and alarm event history from the panel in a friendly, easy to read format. It also allows users to quickly view outstanding alarms and reset those alarms - all with the touch of a button.

Manage user access through the programming of user PIN codes or access control cards. Tecom Mobile also allows you to edit user details including access groups and expiry dates.

Tecom Mobile communicates directly to the suite of Challenger panels, including the Challenger10, ChallengerSE and ChallengerLE.

Tecom Mobile is just another reason why Challenger is your number one choice for intrusion and access control solutions.
